

LUCKY YOU!!

I suggest using heavier white 8.5"x11" paper such as card stock to print these on. Also for best results select the highest print quality available on your printer as well as a borderless print setting. To cut inner parts such as the mouth hole or more intricate shapes such as the mustaches and beards you may be better off with an exacto knife or small pointy scissors such as straight edged nail scissors. You can attach these to shish kabob skewers (cut the sharp points off!), chopsticks, or anything else similar size and shape you may find. It's up to you whether you attach to right, left or center.

Whatever you do please have fun!

Thanks again,
Rose@thepartyproject
